

# TRANSFORMING YOUR SUPPLY CHAIN INTO A STRONG COMPETITIVE ADVANTAGE

**Barloworld Logistics Supply Chain Planning Solutions (SCPS) combines the right software, expertise and methodologies that optimise and enhance your network, transport and inventory performance.**

We maintain a strong focus on the people and process aspects that are required to make technology successful. By implementing smart technology solutions or

leveraging our partnership with Llamasoft, a company specialising in supply chain software development, Barloworld Logistics has been modelling supply chains, optimising inventory and network strategies, sustaining inventory and demand management processes as well as facilitating rapid response to changes in supply and demand, globally.

Combining technology with proven methodologies has helped us construct and interpret results successfully across business sectors around the world.

Our supply chain planning core competencies include:

- Demand planning
- Inventory optimisation
- Sales and operations planning
- Transport modelling
- Supply chain analysis and design
- Risk management
- Cost to serve

**The future of innovation isn't technology, its people.**

**We have the resources, services and expertise to improve visibility, increase flexibility and drive performance.**
