

 **DELIVERING
ENHANCED
VALUE** 

Barloworld Logistics' passion for rail across a range of industries stems from our conviction that each transport mode plays an important and specific role in the supply chain.

By entering into a Memorandum of Understanding with Transnet Freight Rail (TFR) and through collaborating and partnering with recognised experts within

the rail industry, we are at the forefront of migrating large cargo volumes from road to rail where appropriate and commercially viable. Leveraging expert skills and capacity, wise asset investments, developing intermodal terminals and deploying leading-edge technologies with operational expertise at key nodal points:

- rail operations supply, maintain and operate shunting and mainline locomotives
- rail logistics management manage cargo flows from origin to destination
- multimodal terminal operations tranships cargo between road and rail
- collateral management maintains the integrity of cargo through the entire value chain

You experience end-to-end supply chain visibility and integrated solutions.

Barloworld Logistics manages all aspects of your value chain, in accordance to international standards of safety, governance and risk management, successfully delivering the benefits of rail transportation in a world where door-to-door logistics solutions is an absolute necessity.
